

Implementation Science Dialogue

**Panel: Tracey Adesegun, Arin Bonner, Kelly Hall,
and Michele Stansbury**

Title I Administrative Meeting

May 19, 2016

Gail Clark Dickson, Ed.D.

Section Chief, Program Improvement

Implementation Science Training

- Provided school and district leaders in Maryland with a research-based framework to help them successfully implement, sustain, and scale up evidence-based strategies to improve student outcomes in accordance with school intervention plans aimed at improving school performance.

Reflections

Implementation Science (IS)

- What were your take-aways from the IS training?
- What aspect of IS will you implement at the LEA/School level?
- What role do teachers play in IS?
- Where are you now for embedding IS in your work?

Implementation Brief: Co-Creation in Implementation Science

Creating a deeper understanding of the benefits of co-creation approaches and benefits of engaging a range of stakeholders in implementing, improving, and sustaining the use of research evidence to improve outcomes.
