Introduction – Using Suspension Data

The annual suspension data contained in these tables can provide valuable information about student behavior in each local school system and statewide. Suspensions can be indicators of the most serious student misbehavior in the school, as determined by the local school administration. Information on student suspensions in Maryland has been collected by the local school systems and reported to the Maryland State Department of Education for many years. Suspension information can be useful in local and statewide needs assessment and program planning efforts to address the problem of disruptive students in schools.

However, suspension data do not provide complete information about student misbehavior in school. Users of these data are advised to consider the following points in examining these tables:

- The suspension and expulsion data collected and reported by MSDE represent system-level information, aggregated across all school levels.
- Suspension and expulsion figures are indirect measures of student misbehavior. They represent the response of the school to the behavior.
- Many factors can influence how a particular offense is perceived and dealt with in a particular school. Local norms and community standards may lead to varying thresholds for determining that a student should be suspended or expelled for a certain behavior. Often school administrators will consider a student's record in determining whether or not to suspend the student. In other cases local policy may require suspension for a "first offense." Different perceptions of the severity of a particular offense may result in differing disciplinary responses to the offense.
- The availability of alternatives to suspension in different schools may also result in different rates of suspension and expulsion. If the school has few other options when a severe offense occurs, then suspension may be a more frequent response. If programs such as "in-school" suspension, after-school detention, conflict resolution classes, "Saturday school," or other options within a continuum are available to the school administration, some misbehaving students will be assigned to these programs instead of being suspended or expelled.

As with all school improvement efforts, local school systems are encouraged to employ both expanded data sources and school-specific data in planning and needs assessment in the area of student violence or disruption. Additional measures of student misbehavior may be available in objective data such as office referral statistics, as well as in the form of more subjective measures such as climate survey results.

For additional information on this subject, please contact the Division of School and Student Services at 410-767-0307.
